Summary

Enthusiastic B.Tech student in Artificial Intelligence and Machine Learning with strong foundations in Data Structures and Algorithms, having solved 400+ DSA problems across platforms and possessing solid knowledge of core Machine Learning concepts with a focus on building efficient, performance-driven solutions.

Education

Noida Institute of Engineering and Technology

Oct 2023 – June 2027

B.Tech in Artificial Intelligence & Machine learning

- GPA: 8.14/10.00 (Till 5th Semester) **Result**

St. Paul's School, Rampur

April 2022

- Percentage: 82%

Experience

Software Intern Certificate

Hybrid – Aug 2025

L&R Windoors

- Worked as a paid intern (₹10,000/month stipend), contributing to real-world business operations and technical workflows. Designed and implemented a modular, scalable dashboard for business analytics and operational monitoring. Built structured data pipelines and automated reporting mechanisms to improve process efficiency.

Hackathon Participant Certificate

Nov -2025

Microsoft TechJam Hackathon

- Participated in a competitive national-level hackathon organized by Microsoft, collaborating in a cross-functional team environment. Designed and developed a technical solution within a limited timeframe, focusing on problem-solving and rapid prototyping. Applied Data Structures, algorithms, and system design concepts to build an efficient and scalable solution.

Projects

Personal Portfolio Website

[Github Repo](#)

- Designed and developed a fully responsive personal portfolio website to showcase projects, technical skills, and achievements.
- Implemented modern UI/UX principles using **Tailwind CSS** for optimized styling and mobile-first design.
- Structured semantic HTML for improved accessibility and **SEO** optimization.

Termfolio Master – Command-Based Portfolio Terminal

[Github Repo](#)

- Developed a command-driven portfolio terminal interface that simulates a real-world CLI (Command Line Interface) environment. Implemented CI/CD with GitHub Actions for automated model retraining
- Implemented dynamic DOM manipulation and event handling using JavaScript for real-time command execution.
- Optimized performance with clean modular JavaScript architecture.
- Built a responsive and modern UI using Tailwind CSS with custom styling for terminal-like appearance.

MediTracker – Medicine & Health Tracking Application

- Technologies Used: HTML5, CSS3, JavaScript (ES6), Node.js, PostgreSQL, Firebase)
- Designed and developed a user-friendly interface for managing daily medicine schedules.

Technologies

Programming: C++, C, Java, Python, SQL

ML/AI: Machine Learning, MLOps, Data Science, Generative AI, Deep Learning

Web: HTML, CSS, JavaScript, ReactJS, NodeJS, MongoDB, TailwindCSS, Flexbox

Tools: Linux Command Line Interface, Docker, GitHub Actions, AWS, MLflow, DVC, ZenML

Certifications

- Oops ([View](#))
- Unix and Linux ([View](#))
- Operating System ([View](#))
- ML using Tensorflow([View](#))
- ReactJS ([View](#))
- Deep Learning for Developers([View](#))

Achievements

- **Smart India Hackathon (SIH):** Collaborated in the National-Level hackathon, contributing to innovative problem-solving Solutions.
- Solved **300+** Questions on LeetCode ([Profile](#)) and 100+ on GeeksforGeeks ([Profile](#)).
- Selected as a paid Technical Intern at L&R Windoors.
- Designed and deployed a modular dashboard improving operational efficiency.
- Participated in **Microsoft TechJam** Hackathon, developing a scalable solution under time constraints
